

Organic Solutions for Growth

Omnia Specialities Australia Pty Ltd

Technical Bulletin March 2007

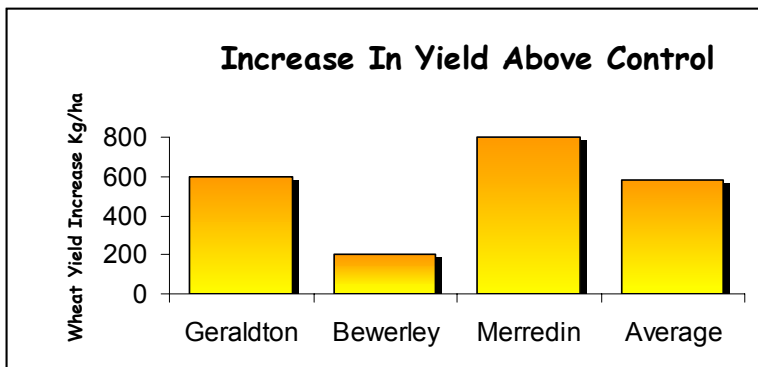

The Key To Stress Management & Yield Enhancement!

Outstanding results in wheat, canola & lupins

Grain crops can be severely affected by stress on a regular basis due to environmental factors or nutrient deficiencies. **OmniBoost-K™** boosts the plants anti oxidant system to rid the plant of toxins and maximise yields.

 OmniBoost-K = 2.5 litres per ha

Independent trials in various locations in Western Australia have yielded outstanding results for **OmniBoost-K™**

+900 KG/HA YIELD INCREASE

Wheat strip trial conducted in Quairading, Western Australia was sprayed with 2.5 litres of **OmniBoost-K™** + 500 grams of Copper Sulphate per hectare to achieve more than 900kg increase in yield (+\$170/ha).

The use of **SeedBoost™** can further improve wheat yield by promoting greater and stronger root growth in the seedlings which enables better nutrient uptake in the critical early stages of growth.

Reduces Stress and Boosts Nutrient Uptake in Horticulture!
