## KK03

### Soil Revitaliser - Liquid Kelp Concentrate

K-kelp manufactured from freshly collected bull kelp (*Durvillaea potatorum*) from the pristine waters of Southern Australia. Using a unique alkaline extraction process the full nutritional value of the kelp is retained whilst ensuring a very high solids content, much higher than many other kelp liquids on the market. Therefore K-kelp is more cost effective.

K-kelp is an organic plant growth stimulant and soil revitaliser, when used in conjunction with an adequate fertiliser program it will:

- revitalise soil and assist the uptake of key nutrients;
- promote root growth and vigour;
- improve colouring in leaves;
- assist plant stress recovery;
- reduce fungal and nematode infestations;
- reduce nutrient leaching.

K-kelp contains macro nutrients, plant growth hormones, amino acids, vitamins, trace elements and is enriched with potassium.

### Application Rate:

Soil: 5 to 7 litres of K-kelp concentrate per hectare. Dilute with water prior to use.

### Availability:

K-kelp is available in 20 litre, 200 litre and 1000 litre bulk containers.

### Typical Analysis (%w/w):

Nitrogen (N)	0.05%	Phosphorus (P)	0.05%
Potassium (K)	3.7%	Calcium (Ca)	0.05%
Sulphur (S)	1.3%	14 Amino Acids	
Trace elements and vitamins		Natural plant growth hormones	
Particle size	<250 microns	pH	9.2
