## KL10

### 100% Pure Bull Kelp

Freshly collected Bull Kelp (*Durvillaea potatorum*) is naturally composted in a unique low temperature process to retain the full nutritional value. The Bull Kelp is harvested from the pristine foreshores of Southern Australia where the purity of the Kelp is superior to northern hemisphere species. Purakelp contains a smorgasbord of trace elements, vitamins, amino acids, plant growth hormones and enzymes.

Purakelp can be used as a soil drench or seed treatment and is a suitable input for organic farming.

Purakelp is a natural organic plant growth stimulant and soil revitaliser, when used in conjunction with an adequate fertiliser program it will:

- revitalise soil and assist in the uptake of key nutrients;
- increase microbial activity in the soil;
- improve water retention;
- promote root growth and vigor;
- assist plant stress recovery;
- reduce nutrient leaching.

### Application Rate:

Soil: 5-7 litres of Purakelp per hectare. Dilute with water prior to use.

### Availability:

Purakelp is available in 20 litre, 200 litre drums and 1000 litre bulk containers.

### Typical Analysis (%w/w):

Nitrogen (N)	870 ppm	Phosphorus (P)	180 ppm
Potassium (K)	2000 ppm	Sulphur (S)	1500 ppm
Calcium	1900 ppm	14 Amino Acids	
Trace Elements and Vitamins		Plant growth hormones	
Particle size	<250 microns	pH	4.1
