

SBL

SeedBoost is a carefully formulated liquid seed dressing to boost seed quality by increasing nutrient levels in seeds. The improved nutrient levels in seeds have a significant effect on crop yield. The larger root biomass increases the survival rate of seeds enabling the crop to uptake nutrients in the critical early stages.

SeedBoost when applied as directed has the potential to:

- increase nutrient levels in seed;
- boost seed quality;
- boost early root growth;
- boost early vigour;
- increase root growth.

Healthy well-developed root systems could lead to:

- improved moisture
- improved nutrient
- improved stress resistance;
- improved disease
- improved yield potential;
- improved profit.

Application:

Apply 3-5 litres of SeedBoost and 2 litres of water per tonne of seed. See Directions for Use for more details and application rates for specific crops.

Availability:

20 litres, 200 litres and 1000 litre containers.

Typical Analysis:

| Elemental Analysis | %W/V | | %W/V |
|--------------------|------|----------------------------|------|
| Nitrogen (N) | 0.61 | Iron (Fe) | 0.33 |
| Phosphorus (P) | 11.4 | Copper (Cu) | 0.63 |
| Potassium (K) | 2.8 | Boron (B) | 0.04 |
| Magnesium (Mg) | 0.78 | Molybdenum (Mo) | 0.08 |
| Sulphur (S) | 4 | | |
| Manganese (Mn) | 3.73 | Fulvic acid and stimulants | |
| Zinc (Zn) | 2.9 | | |
